

## PAPYRUS SOFTWARE

### **BUILDING LIVING APPLICATIONS IN SPEED AND SCALE**

## Papyrus Converse: Deploy Business Value Streams in Record Time

### **Living Applications Without Coding: Efficient, Agile, and AI-Powered**

Papyrus Converse is a leading AI-powered no-code platform that revolutionizes Business Process Management (BPM). By replacing traditional programming, it empowers teams to develop and deploy custom applications faster than ever. **The Result:** Automated complex processes and significant efficiency gains.

### **Speed as a Competitive Advantage**

Don't let complex processes slow you down. Papyrus Converse guarantees unparalleled time-to-market and accelerates the agile delivery of business-critical value streams. It seamlessly integrates inbound and outbound correspondence, ensuring that business communication is an automated part of your process.

Thanks to **Conversational UI and Natural Language Definition (NLP)**, even users without technical backgrounds can manage complex workflows with confidence. This process transforms the tacit knowledge of your experts into permanent digital assets, securing your company's expertise for the long term.

### **Transparency Through Intelligence**

Integrated **Process Mining** allows you to identify bottlenecks immediately, optimize workflows, and increase overall performance through total transparency. By leveraging generative AI (**Watsonx**), Papyrus Converse provides deeper insights through advanced **Document Mining**.

### **Living Applications vs. Legacy Code**

We enable cross-functional teams to create "Living Applications"—apps that adapt continuously during live operations. This approach eliminates "legacy code" and ensures your business processes improve every day without technical debt.

## **CORE COMPETENCIES**

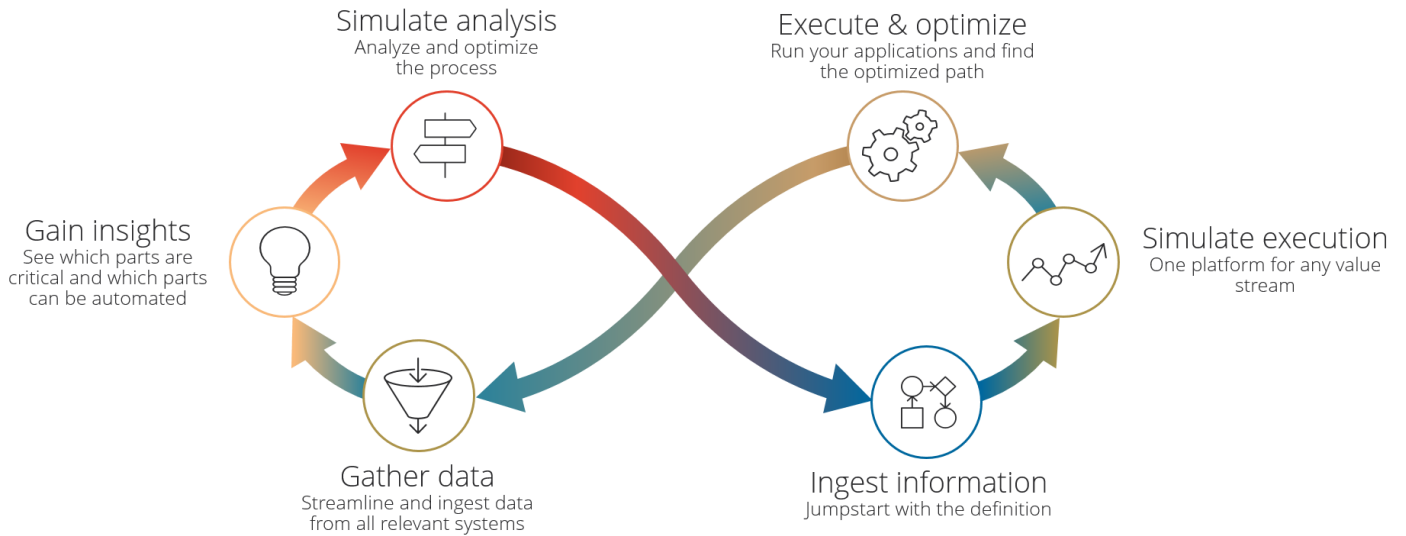

- AI-Powered No-Code Platform
- Expert Knowledge Digitalization
- Process Automation & Optimization
- Seamless Tech Integration
- Holistic Business Process Management (BPM)
- Intelligent Document Mining
- Customer Communication Management

## **KEY DIFFERENTIATORS**

- Unprecedented Speed
- Natural Language Definition (NLP)
- Maximum Flexibility & Adaptability
- Powered by AI (Watsonx)
- Living Applications
- Capturing Tacit Knowledge
- End-to-End Communication Flow

# A NEW PARADIGM

Papyrus Converse is a comprehensive, cross-industry solution for managing and optimizing business processes. We specialize in complex environments to increase transparency, agility, and efficiency while reducing costs. By eliminating bottlenecks, we help organizations improve performance and productivity. Our platform uses the power of **IBM Watsonx** and **Process Mining** to provide advanced analytics—the perfect foundation for data-driven decisions.

## KEY BENEFITS AT A GLANCE

**Unparalleled Time-to-Market:** Significantly faster development compared to traditional BPM tools. Launch applications in a fraction of the time.

**Natural Language Definition:** Define processes in plain language. This empowers business users and turns expert knowledge into digital assets while saving IT resources.

**Flexibility and Adaptability:** Unlike rigid BPM solutions, our platform handles dynamic processes and supports continuous improvement during live operations.

**Leading Tech Integration:** Seamless connection to IBM Watsonx, Process Mining, and business correspondence provides a complete, 360-degree solution.

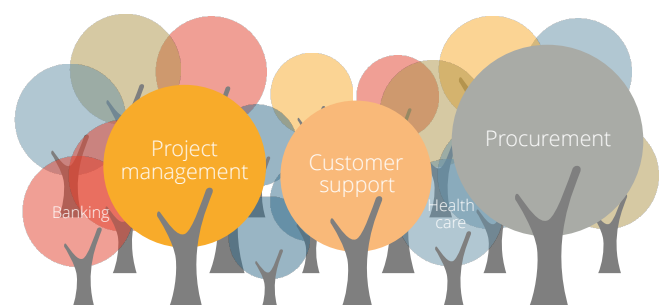

**Living Applications:** Applications are no longer static; they evolve with your business based on real-time data.

## SHAPE THE FUTURE

Papyrus Converse makes organizations more adaptive and agile. The platform creates the foundation for a digital, learning business and drives successful automation. By empowering your business users, you gain a competitive edge and reduce long-term costs.

- **Act, Don't React:** Respond to dynamic market changes in real-time.
- **Strategic Priorities:** Achieve your goals through business empowerment and low Total Cost of Ownership (TCO).
- **Speed & Self-Service:** Execute your own ideas independently—at a fraction of the usual cost and time.
